

OPTARSS II

Relentlessly Assess, Continually Innovate – Ensuring Excellence in Training, Operations and Tactical Systems Deployment

OPTARSS II Capabilities

- ❑ Support the development, planning, scheduling, resourcing, and execution of Army and joint training exercises.
- ❑ Support omnibus operational objectives to include fielding capabilities, training and strategic mobilization communications
- ❑ Support multi-functional logistics planning/analysis - applying such tools as the Joint Planning & Execution System (JOPES)
- ❑ Support exercise budget/operations tasks in joint environments
- ❑ Support aircraft operational and maintenance tasks
- ❑ Support complex force modeling and simulation/DST tasks
- ❑ Support development and validation of strategic transportation plans; support air and sea transportation feasibility studies.
- ❑ Support tactical C⁴I systems mobilization, de-fielding, and maintenance.

MDS' contingent training, operations and systems engineering personnel have proven their ability to rapidly and resolutely support a vast array of short-term and sustained missions around the world. Securely and economically overseen by our OPTARSS II Executive Office (EO), the work and spirit of these individuals is focused on a single objective - to ensure the warfighter is fully trained and resourced over the entirety of his or her tour.
